Powering Partnerships, Powering Growth

Featured In This Issue:

- ★ COVID-19 State of the Business pg 1
- ★ NEW! Power Defense MCCBs pg 2
- ★ Increased virtual training opportunities pg 2
- ★ NEW! Managed Rack PDUs pg 3

Dear Channel, Customers & Partners,

We are dealing with an unprecedented operating environment as this global health crisis impacts our work and daily lives. The situation is ever-evolving but despite the challenges our focus remains on the health and safety of our employees, channel partners, customers, and our communities.

Additionally, with the ever evolving situation our team is striving to be agile and adaptive to maintain connectivity and presence in our markets. Communication and service are critical needs now more so than ever, as many organizations are working distributed and remote, potentially staggering shifts, working to socially distance, and limit overall exposure. Our team is focused and we are working as an organization to leverage technology and the technical acumen of our resources to provide value and information to our customers, using non-traditional methods. Please continue to leverage your local resources if issues arise to work towards specific solutions to minimize the effect on your business.

Eaton is a strong resilient organization, and we are committed to supporting our partners as we work together through this complex time.

Thanks,
James Reed - Area Sales Manager
