

Powering Business Worldwide

Technical Resource Center 877-ETN-CARE (386-2273) Option 2

Contactors, starters, soft starters, enclosed control, pushbuttons, control relays, overload protection, terminal blocks, power supplies, indicating lights, control power transformers and crane control

Option 1

Circuit protection

Option 2

Residential products

Option 3

Component distribution products including dry-type transformers, safety and disconnect switches, commercial panelboards and switchboards

Option 4

Power management components and meters, electrical power management software including Foreseer and Foreseer Reporting Services, protective relays, power factor capacitors, industrial/commercial surge protection, commercial automatic transfer switches

Option 5

Automation products including operator interfaces, PLCs, Easy relays, Durant count control, communications for overloads, starters and MCCs, connected devices

Option 6

Low-voltage variable frequency drives, 600 volts and below

Option 7

Medium-voltage motor control and drives including Ampgard™ motor starters, XP3, MV4S, SC9000™

Option 8

- Option 1** Residential circuit protection
- Option 2** Molded case circuit breakers and industrial miniature circuit breakers
- Option 3** Low-voltage and medium-voltage power circuit breakers
- Option 1:** Technical support
- Option 2:** Pricing
- Option 3:** Trip unit retrofit kit selection
- Option 4:** Upgrade existing Magnum trip unit
- Option 4** Bussmann fuses

- Option 1** Dry-type transformers, safety and disconnect switches
- Option 2** Replacing breakers in any older panelboard not identified as Pow-R-Line or PRL
- Option 3** Power-R-Command lighting control
- Option 4** Pow-R-Stock unassembled panelboards
- Option 5** For all other panelboard and switchboard assemblies

- Option 1** XV, XP, HM/i Series, ELC-GP, Visual Designer and Galileo
- Option 2** PLCs, Easy relays, CoDeSys SmartWire, remote I/O and gateways
- Option 3** Limit switches, photoelectric and proximity sensors
- Option 4** Durant count control products
- Option 5** Communication support for overloads, starters and MCCs
- Option 6** Connected solutions including Control Xpert

- Option 1** Pre-sale support for medium-voltage control, Ampgard products
- Option 2** Pre-sale support for SC9000 medium-voltage drives
- Option 3** Post-sale troubleshooting and technical support for Ampgard products
- Option 4** Post-sale troubleshooting and technical support for SC9000 medium-voltage drives

- Option 1** Residential products including loadcenters and circuit breakers, meter sockets, whole house surge protection and standby power
- Option 2** Wiring devices including residential lighting control, receptacles, switches, straight blade and locking devices

- Option 1** Power Xpert, IQ meters, gateways, software and startup service, INCOM and PowerNet communication products and protective relays
- Option 1:** Power quality meters such as Power Xpert and IQ meters, protective relays such as the E-Series, FP Series, MP Series relays, and communication products such as the Power Xpert Gateway
- Option 2:** EPMS Foreseer Software, Power Xpert Reporting, PXS and PowerNet
- Option 3:** Cloud applications such as Eaton's Power Xpert energy visualization and analytics or Eaton's Power Xpert billing generator
- Option 2** Industrial and commercial surge protection, electronic voltage regulators, sag ride-through devices, side-mounted harmonic correction units and power factor correction
- Option 3** Technical support or warranty assistance on commercial and industrial automatic transfer switches

- Option 1** Assistance with pre-sale application support, new or aftermarket part number identification
- Option 2** Networking including Modbus®, DeviceNet™, PROFIBUS® and Ethernet communications
- Option 3** Startup assistance
- Option 4** Troubleshooting assistance
